

Science ♦ Questions ♦ Everything

An infinity of questions
To ignite imaginations
To wonder
How and what and why
And where it all began

First observations
Then explorations
Sought answers
To these central questions
Posed by curiosity
Behold -
A single singularity

That's where it all began

From one united infinity
Now diverse plurality
A myriad variety
Evolving
Throughout history
A complicated tapestry
Including all
The large and small
Everything and
You and me

Questing for elucidation
Clearing any obfuscation
Defying myths
And superstition
Disproving pseudo-
explanations
Based on weak interrogation
Of the vast enormity
Of the universe miscellany

Engaging disputation
Sparks
Research investigation
Inspires ingenuity
Seeks understanding, clarity
Until with evidence
Reveals
The mysteries no longer sealed
No longer fraught with
Trepidation due to
Ignorant misperception
For Science and discovery
Unveils what is
For all to see
